To Whom It May Concern:

We are pleased to state that Molecular Technologies has been a great addition to Ellis Island Casino. Molecular Technologies installed and maintains the air purification system, known as Pure Air Technologies' Casino Air System and it has surpassed all of our expectations. The system's performance is certainly praiseworthy and has dramatically improved the air quality in our establishment. Further more, Molecular Technologies' professionalism was commendable during installation and they have maintained that professionalism throughout the system maintenance period.

The Ellis Island Casino's employees and guests have truly experienced a new level of indoor air quality control systems. As a testament to the system's performance, numerous employees and guest have complimented on the overall improvement of the casino's air quality, without the knowledge of updating the indoor air quality system.

While we have received an outstanding product and services, we have also experienced a significant energy savings. Our current energy invoicing has shown an average of 15% savings since installation and we are expecting it to trend closer to 20% as we reach the hotter months.

I am happy to refer them as a valuable asset to your organization. Please feel free to contact me for any help I can provide to Molecular Technologies.

Sincerely,

Marcus Zavala,
General Manager
Ellis Island Casino & Brewery
